13.893 MECHANISMS OF ENVIRONMENTAL DISEASES AND DISORDERS

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

AUTHORIZATION: Public Health Service Act, Section 301; Public Law 78-410, as amended; 42 U.S.C. 241.

OBJECTIVES: To gain a thorough understanding of the mechanisms involved in disease processes and to prevent or reduce disease caused by environmental agents. After a potential or real hazard is identified, the essential next step is a concerted effort to understand how tissue responds to pathological insult. Once the disease process is understood, means can be taken to either avoid, alter, or possibly correct the condition under which man becomes a victim of his environment. Developing an understanding of the biochemical and biological mechanisms of disease will contribute to the most efficient means of disease prevention; provide information regarding the relative susceptibility of people who are at higher risks (by virtue of their genetic background, nutritional status, preexisting disease state or lifestyle); improve the ability to predict long-term chronic effects; contribute to the development of sensitive assay systems; improve the ability to reliably extrapolate the results of laboratory animal studies to man and improve the capability of regulatory agencies to control general exposure to known hazards.

Treatment was documented for 92.6 percent of these infected women. Although more than 327 cases of penicillinase-producing (penicillin-resistant) Weisseria gonorrhea (PPNG) cases have been reported, intensive surveillance, screening and case-referral services have prevented the establishment of an endemic focus for this new strain of gonorrhea in the United States. OBJECTIVES: To aid lower-income families in obtaining decent, safe and sanitary housing in private accommodations and to promote economically mixed existing, newly constructed, and substantially and moderately rehabilitated housing.

TYPES OF ASSISTANCE: Direct Payments for Specified Use; Project Grants.

USES AND USE RESTRICTIONS: Provides housing assistance payments to participating private owners and Public Housing Agencies to provide decent, safe and sanitary housing for lower and very low-income families at rents they can afford. Housing assistance payments are used to make up the difference between the maximum approved rent due to the owner for the dwelling unit which is reasonable in relation to comparable market units and the occupant family's required contribution towards rent. Assisted families are required to contribute not less than 15, nor more than 25 percent of their adjusted family income toward rent.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any private owner (profit-motivated and nonprofit, cooperative, or an authorized public housing agency (any State, county, municipality or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of housing for low-income families).

Beneficiary Eligibility: Very low-income families (whose income does not exceed 50 percent of the median income for the area as determined by the Secretary with adjustments for smaller and larger families); lower income families (whose income does not exceed 80 percent of the median income for the area adjusted for family size). A very low income or lower income single person who is elderly, disabled or handicapped, displaced, or the remaining member of an eligible tenant family is also eligible. At least 30 percent of the families assisted should be very low income families with gross incomes not in excess of 50 percent of area median income.

Credentials/Documentation: In the Existing Housing and Moderate Rehabilitation Program, the Public Housing Agency must support its application by furnishing data that the program proposed is consistent with any applicable Local Housing Assistance Plan. In the absence of such a Plan, demonstrate that the proposed program is responsive to the condition of the housing stock in the community and the housing assistance needs of lower-income families (including the elderly, handicapped and disabled, large families and those displaced or who will be displaced) residing in or expected to reside in the community; and that there is or will be available in the area public facilities and services adequate to serve the proposed housing. In the case of a Housing Finance or Development Agency (HFDA) application, the HFDA shall provide certification that based upon an HFDA or HFDA-approved housing needs study, there is need for housing assistance for the number and size of units applied for: An application for housing to be newly constructed or substantially rehabilitated under the Section 8 HFDA program is exempt from the provisions of Section 213(a) of the HCD Act unless the unit of general local government in which the assistance is to be provided objects in its Housing Assistance Plan to the exemption. In the latter case, no application for housing may be approved by HUD unless HUD requirements implementing the provisions of Section 213 or the HCD Act have been satisfied. In the Section 8 New Construction and Substantial Rehabilitation Programs administered directly by HUD, proposals are generally submitted in response to Notifications of Fund Availability published for specific allocation areas, based on that area's Fair Share Allocations. Selections are generally made on a competitive basis. Previously submitted "pipeline" proposals which are of high quality and were found approvable but not funded in the prior fiscal year are reviewed first, when any new contract authority becomes available. If additional authority remains, HUD may consider preapproved sites, and in certain areas, permit selection of developers by local governments. Where there are set-asides for projects to be owned by local public housing agencies or to be located in HUD-approved New Communities or for other purposes, proposals may be received, processed and approved without the need to await specified acceptance periods or to undergo formal competition. In the case of a geographic area for which there is an approved Housing Assistance Plan, the Economic and Market Analysis Division of HUD field offices will examine each Plan and prepare a recommended mix, number of units by bedroom size, and elderly-nonelderly distribution, which takes into account and is consistent with the contents of the Plan. In the case of a geographic area where there is no approved Housing Assistance Plan, the Economic and Market Analysis Division of HUD field offices will prepare a recommended program mix, number of units by bedroom distribution, and elderly/nonelderly mix.

OBJECTIVES: To develop viable urban communities, including decent housing and a suitable living environment, and expand economic opportunities, principally for persons of low and moderate income.

TYPES OF ASSISTANCE: Formula Grants.

USES AND USE RESTRICTIONS: Cities may undertake a wide range of activities directed toward neighborhood revitalization, economic development, and provision of improved community facilities and services. (The Block Grant Program consolidates seven former community development-type categorical programs, including Urban Renewal, Model Cities, Neighborhood Facilities, Open Space Land, Historical Preservation, Urban Beautification, the Basic Water and Sewer Facilities Program, Public Facilities Loans, and Rehabilitation Loans.) Some of the specific activities that can be carried out with block grant funds include acquisition of real property, relocation and demolition, rehabilitation of residential and nonresidential structures, and provisions of public facilities and improvements, such as water and sewer facilities, streets, and neighborhood centers. In addition, block grant funds are available to pay for certain public services which are necessary or appropriate to support other block grant activities. Units of local government may contract with other local agencies or nonprofit organizations to carry out part or all of their programs. Generally, communities are restricted from constructing or rehabilitating public facilities for the general conduct of government and certain community-wide facilities, (i.e., stadiums, sports arenas, cultural centers, central libraries, convention centers), and from underwriting the cost of constructing new housing, or of making housing allowance- or other income maintenance-type payments. Neighborhood-based nonprofit organizations, local development corporations or Small Business Investment Companies may act as subgrantees to carry out neighborhood revitalization or community economic development projects in furtherance of block grant objectives. Cities have the discretion to design programs and establish priorities for the use of funds, so long as the programs conform to the statutory standards and program regulations. All projects or activities must either principally benefit low and moderate-income persons, aid in the prevention or elimination of slums and blight or meet other community development needs having a particular urgency.

Applicant Eligibility: Cities in SMSA's with populations in excess of 50,000, "urban counties," as defined in the Act, and cities with populations of under 50,000 which are central cities in SMSA's are all entitled to receive amounts of funds determined by a statutory formula. In addition, other localities which received grants under the urban renewal and model cities programs will receive "hold harmless" grants based on their level of prior participation in those programs; but only through fiscal year 1979.

Beneficiary Eligibility: The primary beneficiaries with grant recipient government units are low and moderate income residents, (generally defined as families with less than 80 percent of the median family income).

Credentials/Documentation: Costs will be determined in accordance with FMC 74-4 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: In preparing an application, environmental factors must be taken into account, and an activity requiring an environmental review must be reviewed before funds for that activity can be released. An environmental impact statement is necessary for this program. Applications are subject to State and areawide clearinghouses review pursuant to procedures in Part I, Attachment A of OMB Circular No. A-95 (revised).

Application Procedure: Every third year, localities submit a Community Development and Housing Plan and a Housing Assistance Plan. RELATED PROGRAMS: 14.219, Community Development Block Grants/Small Cities Program.

EXAMPLES OF FUNDED PROJECTS: Examples of funded projects are as follows: a. Boston, Massachusetts. The City has received preliminary approval of an action grant to assist in the development of the Crosstown industrial project located between the Archer and Roxbury neighborhoods. Community Development Corporation (CDC), a local development corporation, will construct a new manufacturing facility to house the expansion of Healthco, Inc., creating 200 new permanent jobs and retaining an additional 130 jobs. The action grant of $1,585 thousand to the City of Boston is to be used for land acquisition, relocation, demolition, and site preparation. The property then will be transferred to CDC, which will utilize a $5 million industrial revenue bond issue, grant funds from the Economic Development Administration, and City general obligation bonds to contruct a 160,000 square-foot facility to be leased by Healthco. The City will contract with Opportunities Industrialization Centers and the local CETA agency to recruit and train new workers. A minimum of one-third of all new permanent jobs will go to low-income and minority persons. b. Cressona, Pennsylvania. On May 7, 1979, HUD announced preliminary approval of an action grant of $3.3 million for the Borough of Cressona to be used as a loan from the Borough to the Cressona Aluminum Company. Together with loans from the Economic Development Administration, the State of Pennsylvania, and private financing, the action grant enabled the Cressona Aluminum Company to acquire, improve, and reopen an old Alcoa Aluminum extrusion plant that had closed two years before. By mid-July the plant was in the initial stages of operation with 80 employees; and, as of December 1979, 225 employees were on the payroll. As the plant builds to full operation and productivity, a total of 600 persons will be employed. Total private investment will exceed $15 million. Proceeds from the repayment of action grant funds, plus interest, will be shared by the Borough with other distressed communities and will be used for other economic development activities. c. San Antonio, Texas. On April 6, 1978, HUD announced preliminary approval of an action grant of $6.5 million to assist in land acquisition for a 522-room hotel, retail space (50 percent to be occupied by minority entrepreneurs), parking garage, and multilevel pedestrian walkway. This Alamo Plaza-Paseo del Rio linkage project will be part of a comprehensive revitalization of six blocks in the heart of San Antonio's historic downtown area. Groundbreaking for the hotel site occured during June 1979, and all components of the project are expected to be completed by July 1981. The Mexican-American Unity Council, an Hispanic community development corporation, will have an equity ownership in the hotel along with Ira Hardin Company and AFCO Realty Associates. The Council also will coordinate CETA employment referrals for positions in the hotel. A total of $37.1 million of private funds will be invested in the complex, generating 770 new permanent jobs. Because of continued optimism about the project's potential, the developers recently have decided to add an additional 114 rooms to the hotel.

CRITERIA FOR SELECTING PROPOSALS: a. Cities and Urban Counties. Proposals are funded on the basis of the following criteria. (1) The primary criterion is the comparative degree of physical and economic distress among applicants, as measured by the differences in the following factors, which are assigned relative weights as follows: (a) the percentage of their total housing stock that was built prior to 1940 (50 percent); (b) the percentage of their total current population that was in poverty in 1970 (30 percent); and (c) the degree to which their population growth rate lags behind that of all metropolitan cities (20 percent). (2) The comparative degree of physical and economic deterioration of applicants, including per capita income, unemployment, and job lag/decline. (3) The demonstrated performance of the applicant in carrying out housing and community development programs. (4) The impact of the proposed project on the special problems of low-and moderate-income persons and minorities. (5) The nature and extent of financial participation by private entities in the proposed project. (6) The extent of financial assistance to be made available by the State. (7) The nature and extent of financial participation by other public entities in the proposed projects. (8) The impact of the proposed project on the physical, fiscal, or economic deterioration of the community. (9) The extent to which the project represents a special or unique opportunity to meet local priority needs which are consistent with the objectives of economic revitalization or reclamation of neighborhoods. (10) The feasibility of accomplishing the projects in a timely fashion within the total resources which will be provided. (11) Phase-down or elimination of old-harmless entitlements. b. Pockets of Poverty Communities. The Secretary will not use as the primary criterion the comparative degree of distress, but rather the comparative degree of distress among pockets of poverty as measured by the eligibility criteria for cities not meeting minimum standards, and by the comparative benefits to be provided to the low- and moderate-income residents of the pocket of poverty. Proposals for pockets of poverty will be considered separately from those submitted by distressed cities and urban counties. However, the selection criteria of (3) through (11) above supplements by additional criteria will be used to select projects for funding. Each project submitted by a jurisdiction eligible on the basis of a pocket of poverty must compare favorably on its own merits with any other action grant project to be selected for funding.

For programs that are not identified as suitable for joint funding, the applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved. In general, funds are not available for: (1) research of primarily local nature and benefits, (2) institutional support or operating funds, and (3) development of marketable products.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State and local governments, public and/or private profit and nonprofit organizations which have authority and capacity to carry out projects.

Beneficiary Eligibility: Same as Applicant Eligibility.

Range and Average of Financial Assistance: For HIP, maximum of $20,000 for repairs; $2,500 for temporary and emergency housing; $5,000 for a down payment to obtain loan for housing; and $45,000 for new standard housing ($55,000 in Alaska only). The average cost for repair is approximately $10,000. Average new housing construction is approximately $25,000.

PROGRAM ACCOMPLISHMENTS: For HIP, in fiscal year 1979 over 4,100 homes have been repaired and some 725 new houses built. For HUD, as of September 30, 1979, 34,100 HUD assisted units were completed and under management by Indian housing authorities.

EXAMPLES OF FUNDED PROJECTS: Quileute Demonstration Project-Quileute Reservation, approximately one mile outside of La Push, Washington, 24 single units. Four elderly units. (These units are two duplex units) This is one of the finest examples of HIP which can produce a quality house taking into consideration local wishes and desires. Eighteen units in Little Diamede, Alaska. Prior to HIP undertaking there was no housing in this area. No other federally-assisted housing program was able to meet this need. The impact of this housing in the area has been significant. Not only the Natives have been able to live in decent housing but the effort proved decent housing could be a reality in remote Alaska Villages. Thus, as a result of this HIP effort housing programs started in Alaska Villages.

CRITERIA FOR SELECTING PROPOSALS: There are no proposals in the HIP per se: Requests for HIP funding are made by tribes for the repair and renovation of their existing Indian housing. The repair and renovation is accomplished by direct grants. Priorties are set by tribes and families to receive assistance under the HIP and are selected by tribes taking into account the family size, income, condition of present housing and the availability of other federally-assisted housing programs.

Records of approximately 70 structures were transmitted to the Library of Congress during fiscal year 1979. An index of Industrial Archeology has been established based on the input of Historic American Engineering Record Inventory Cards, approximately 5,500 entries from individual, public participation and agency cooperation. Motion pictures of historic industrial processes constitute a new form of documentation. During 1979, the Historic American Engineering Record continued to serve as the focus for HCRS's preservation efforts in industrial and engineering history. HAER's transmittals to the HAER archives in the Architecture, Design and Engineering Collection in the

Prints and Photographs Division of the Library of Congress exceeded 5,000 pieces of documentation (photographs, measured drawings, and historical monographs). These transmittals included project records from North Carolina, Delaware, and Georgia. It is projected that in 1980 HAER will transmit project records for at least five States and two territories. These transmittals will exceed 8,000 pieces of archival documentation. HAER's inventories of historic and industrial engineering sites continued throughout 1979 in Connecticut, Kansas, New Jersey, Washington, Indiana, Montana and Wisconsin. These inventories will be published upon completion. During 1979, HAER published an inventory of the historic engineering and industrial resources in Rhode Island. The Rehabilitation Action efforts included projects in Lockport, Illinois; Butte-Anaconda, Montana; Laguna Pueblo, New Mexico; Lehigh Canal in Easton, Pennsylvania; Seattle, Washington; and Tacoma, Washington. Fiscal year 1980 will also see the publiction of Northwest New Jersey: an inventory of historic engineering and industrial structures; a survey on historic bridges in Montana; an inventory of industrial and enginering structures in Milwaukee, Wisconsin; and three sets of guidelines covering procedures for recording projects, inventories and Rehabilitation Action Projects. Executive Order 11593 recording projects conducted during 1979 incuded a 1905 arch bridge in Walpole, New Hampshire; a Waddell 'A' truss bridge in Smithville, Missouri; and Womack's Mill in Caswell, North Carolina. Two emergency recording teams recorded structures in Watervliet, New York, and St. Albans, Vermont. HAER's summer recording projects included the Battle Creek Hydroelectric system in Red Bluff, California; Qyonset Point Naval Air Station in Quonset Point, Rhode Island; Ben Thresher's Mill in West Barnet, Vermont; the Auditorium Building at Roosevelt University in Chicago, Illinois; and ten structures in Cleveland, Ohio. The Rehabilitation Action, Recording and Inventory program sponsored by the Historic American Engineering Record employed over 70 student architects, historians, planners, and engineers. In addition to its recording, rehabilitation and inventory efforts, HAER continued to given technical assistance to various interested groups in the public and private sectors as well as other Federal agencies. During 1980, HAER will continue its rehabilitation, inventory and recording efforts on the same level as in 1979.

15.414 NATIONAL HISTORIC LANDMARK

FEDERAL AGENCY: HERITAGE CONSERVATION AND RECREATION SERVICE, DEPARTMENT OF THE INTERIOR

AUTHORIZATION: Historic Sites Act of August 21, 1935; Public Law 74-292; 16 U.S.C. 461 et seq.; National Historic Preservation Act of October 15, 1966; Public Law 89-665; 16 U.S.C. 470(t).

OBJECTIVES: To study, identify, and encourage preservation of nationally-significant historic properties; a bronze plaque and certificate are awarded in a presentation ceremony when reqested. This provides permanent identification of nationally significant properties.

TYPES OF ASSISTANCE: Advisory Services and Counseling.

USES AND USE RESTRICTIONS: Properties recognized as National Historic Landmarks may, upon application by the owner or administrator, be awarded a certificate and bronze plaque attesting to national significance. At the same time, the applicant is requested to observe certain simple preservation precepts with regard to the property. Should subsequent occurrences alter the historic character of the site, landmark status may be revoked and the plaque and certificate removed. Automatic listing of National Historic Landmark properties on the National Register of Historic Places affords a degree of Federal protection under Section 106 of the Historic Preservation Act of 1966, and fulfills one of the prerequisites for Federal assistance under the National Register grants-in-aid program (see 15.411). Landmarks are also made eligible for the benefits and protections of the Tax Reform Act of 1976. National Historic Landmarks are generally selected from regularly-programmed theme studies.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Anyone may suggest to the State Historic Preservation Officer in his State that a property be considered for inclusion in an appropriate National Historic Landmark theme study, provided the property has potential national significance with relation to some broad facet of American history. Owner of property may be individual, government, or corporate body. Properties of only State or local significance do not qualify.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Request should be supported by full exposition of national significance of property.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: If the site is not on the National Register of Historic Places, write the State Historic Preservation Officer of the State in which the site is located giving brief resume of history of the site and its present condition and advising what assistance can be provided in the nomination process. If the property is already on the National Register provide the State Historic Preservation Officer with brief resume of the historical facts that justify consideration of national significance.

Award Procedure: Sites nominated to the National Register of Historic Place with "National Significance" are automatically reviewed by the landmarks staff of the National Register. When the property has been investigated, findings are presented to an Advisory Board for HCRS which evaluates its national significance and recommends a final action to the Secretary of the Interior. Owners of proposed landmarks are notified prior to a landmark study and after a landmark is designated.

Deadlines: None.

Range of Approval/Disapproval Time: Determined by scheduling of theme studies, availability of staff or funds, and proximity to spring and fall Advisory Board meetings.

Appeals: Owner comments are sought prior to meeting of the Consulting Committee. Committee meetings are open to the public.

15.416 NATIONAL REGISTER OF HISTORIC PLACES

(National Register)

FEDERAL AGENCY: HERITAGE CONSERVATION AND RECREATION SERVICE, DEPARTMENT OF THE INTERIOR

AUTHORIZATION: National Historic Preservation Act of October 15, 1966, Public Law 89-665, 16 U.S.C. 470, 80 Stat. 915 et seq. (1970 edition); Executive Order 11593 of May 13, 1971; Tax Reform Act of 1976, Public Law 94-455; Public Law 94-442; 90 Stat. 1519; Revenue Act of 1978; Public Law 95-600.

OBJECTIVES: To expand and maintain the National Register as a planning tool and source of information on sites, buildings, districts, structures, and objects of historical, architectural, archeological and/or cultural significance by assessing the significance of properties and by making the contents of the National Register available to the public; to coordinate with Federal agencies and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218); and to make certain certifications with respect to the historic character of buildings and structures, the rehabilitation of historic buildings and structures, and the preservation criteria of State and local statutes.

TYPES OF ASSISTANCE: Advisory Services and Counseling.

USES AND USE RESTRICTIONS: Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60.6. Listing does not affect the range of actions an owner may take, as long as Federal financing is not involved and no governmental unit receives any authority or control over the property, including its use and disposition. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.411), to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" under the Tax Reform Act of 1976, as amended by Public Law 94-455, and under the Revenue Act of 1978 (see also 15.915).

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix); and Federal agencies required to list and consider historic properties within their jurisdiction as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, operating under programs administered by representatives (listed in Appendix) appointed by the heads of the agencies. Applicants eligible for Tax Reform Act benefits include owners of properties certified by the Secretary of Interior as being historic or in a district certified as historic.

Beneficiary Eligibility: Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic or in a district certified as historic.

Credentials/Documentation: Nominations are submitted on standard nomination forms (revised 1976) provided upon request to the State Historic Preservation Officers and the Federal Representatives, who must certify that each property was properly nominated. Letters of request for determinations of eligibility must be adequately documented as described in Appendix A of 36 CFR Part 63. Requests for certification of historic properties must be documented as described in Section 67.1 of 36 CFR Part 67 and requests for certification of State and local statutes must be documented as described in Sec. 67.9 of 36 CFR Part 67. To participate in the program, each State must have an approved review committee, an approved State staff, and an accepted statewide plan. Governors (or their designated Plan review agencies) must be given an opportunity to review the State Plan pursuant to Part III, Attachment A of OMB Circular No. A-95 (revised). State Plan deadline is January 15, 1979.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: For National Register nominations the signature of the State Historic Preservation Officer on the nomination form certifies that the State review committee has approved the nomination and that all applicable procedures, including notification to the property owner at least once during the nomination process, have been followed. The signature of the Federal Representative on the nomination form certifies that the property has been nominated in compliance with Executive Order 11593, and that the State Historic Preservation Officer has been allowed 90 days in which to present the nomination to the State Review Board and to evaluate its significance. Documentation for Tax Reform Act certification of statutes must be submitted to the appropriate State Historic Preservation Officer by the authorized representative of the government that enacted the statute.

Application Procedure: After the property is approved by the State Historic Preservation Officer or Federal Representative, the nomination form or letter of request for a determination of eligibility should be forwarded to the Keeper of the National Register, Heritage Conservation and Recreation Service, Department of the Interior, Washington, DC 20243. Nominations submitted for review are announced in the Federal Register to provide a period of comment. Documentation for certification of State and local statutes should be forwarded to the Keeper.

Award Procedure: The professional review staff of the National Register determines whether the properties meet the National Register criteria as contained in 36 CFR Part 60.6. Properties that meet the criteria are then officially listed in the National Register and become eligible for benefits provided by the Tax Reform Act of 1976 and the Revenue Act of 1978.

Deadlines: See program 15.411, Historic Preservation Grants-in-Aid.

Range of Approval/Disapproval Time: Time required for evaluation of nomination varies.

Appeals: A nomination returned to the States or Federal agencies may be resubmitted, depending upon the reason for its rejection.

FEDERAL AGENCY: HERITAGE CONSERVATION AND RECREATION SERVICE, DEPARTMENT OF THE INTERIOR

AUTHORIZATION: Urban Park and Recreation Recovery Act of 1978, Title X, Public Law 95-625; 16 U.S.C. 2501-2514.

OBJECTIVES: Federal grants to economically hard pressed communities specifically for the rehabilitation of critically needed recreation areas, facilities, and development of improved recreation programs for a period of five years.

TYPES OF ASSISTANCE: Project Grants ((Rehabilitation of existing indoor and outdoor recreation facilities), (Demonstration of innovative ways to enhance park and recreation opportunities), (Development of recreation plans, Recovery Action Programs)).

USES AND USE RESTRICTIONS: Rehabilitation grants are matching capital grants (70 percent Federal-30 percent local) to local governments for the purpose of rebuilding, remodeling, expanding, or developing existing outdoor or indoor recreation areas and facilities. Funds may be used to improve parks, buildings, and support facilities. Funds may not be used for routine maintenance and upkeep activities nor may they be used for acquisition. Innovation grants are matching grants (70 percent Federal -30 percent local) to local governments to cover costs of personnel, facilities, equipment, supplies or services designed to demonstrate innovative and cost-effective ways to enhance park and recreation opportunities at the neighborhood level. These funds may not be used for routine operation and maintenance activities. Innovation grant awards nationwide are limited to ten percent of the total annual authorization for the Urban Park and Recreation Recovery program. Recovery action program grants are matching grants (50 percent Federal-50 percent local) to local governments for the development of local park and recreation system recovery plans. Eligible activities include resource and needs assessment, coordination, citizen involvement and planning, and program development activities to encourage public definition of goals. Recovery action program grants are chiefly intended to assist local efforts to develop priorities and strategies for overall recreation system recovery. State, local and private funds may be used as the non-Federal share of project costs. In addition, two types of Federal funds may be used as part of a local match: General Revenue Sharing (Treasury Department) and Community Development Block Grant (CDBG) programs funds (Department of Housing and Urban Development). Section 1009 of the UPARR Act prohibits use of any other type of Federal grant to match UPARR grants. All properties assisted through this program must be open to the public.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Eligible applicants are cities and counties meeting the eligibility requirements and listed in the October 9, 1979, Federal Register. Eligibility is based on need, economic and physical distress, and the relative quality and condition of urban recreation facilities and systems. Jurisdictions which are located within standard metropolitan statistical areas that are not on the eligibility listing may apply for funds provided that these grants are in accord with the intent of the program. These funds are limited to 15 percent of the funds available annually for rehabilitation, innovation and recovery action program grants.

Beneficiary Eligibility: Same as Applicant Eligibility; the general public.

Credentials/Documentation: After October 1, 1980, jurisdictions must have an approved Recovery Action Program on file with the Service in order to compete for rehabilitation and innovation grants. This document outlines the high priority recreation needs of jurisdictions and is a step toward good recreation planning. The plans must be submitted to and approved by HCRS regional offices before a jurisdiction can apply for funding. Costs will be determined in accordance with FMC 74-4 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Applications are subject to State and areawide clearinghouses review pursuant to procedures in Part I Attachment A of OMB Circular No. A-95 (Revised). OMB has granted a procedural variation for this program for fiscal years 1979 and 1980 (jurisdictions should request a copy of Administrative Note Number 10 dated July 31, 1979). In order to reduce the amount of time and documentation needed for a formal application, and to foster the competitive aspects of the UPARR program, a preapplication procedure will be used. (a) The preapplication should provide information adequate to guide proposal selection. Grants will be awarded in accordance with the availability of funds. Funding for an approved grant will not be increased from subsequent yearly appropriations. (b) Applicants are encouraged to discuss their proposals with their HCRS Regional Office to determine basic eligibility and appropriateness prior to submitting a preapplication. If a State is assisting the applicant in preapplication preparation, providing a source of matching share, or giving technical assistance, the State may wish to assist in submission of the preapplication to the appropriate HCRS Regional Office.

Application Procedure: Preapplication shall be submitted to the appropriate HCRS Regional Office by the chief executive officer of the applicant jurisdiction. Only basic information should be submitted at this time. The preapplication must include those items as set forth in the Preapplication Handbook available from any HCRS Regional Office.

Award Procedure: All grant proposals will first be reviewed by the regional office to assure that they meet all minimum legal standards. When this review has been completed, and if a proposal meets the minimum legal standards, it will be certified as eligible for funding. Proposals not meeting minimum legal standards will be returned to the applicant. Periodically (three times a year once the program is fully operational), all certified proposals will be evaluated and ranked in the regional offices. The highest priority proposals within established funding limits will be submitted to the HCRS, Washington, DC Office where they will be judged by panels whose members are knowledgeable in recreation and urban revitalization. Innovation and Rehabilitation proposals will be ranked separately. Following review and ranking by the panels, the Director will approve tentative grant offers for those proposals which may be funded. Successful applicants will be notified by the HCRS Regional Offices, and completion of the formal application process will take place. The formal application process must be completed within 120 days of notification of the tentative grant offer, or the tentative grant offer may be withdrawn. Final approval of the grant and obligation of funds will occur when all application requirements have been met and the appropriate documents are on file. No costs may be incurred or reimbursed until final HCRS approval and signing of the grant contract by HCRS officials.

Deadlines: None.

Range of Approval/Disapproval Time: Within 30 days.

Appeals: None.

Renewals: If an applicant wishes a proposal to remain in the competition, it may be considered for two additional funding cycles with or without modifications before it is returned to the applicant. Applicants who already have a proposal in competition must submit a request for withdrawal of the previous proposal before submitting a new proposal in the same category.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: (a) Recovery Action Program grant matching. Up to 50 percent matching grants are authorized for the preparation of Recovery Action Programs. Local in-kind donations of assistance (salaries, supplies, printing, etc.) for the preparation of a Recovery Action Program may be used as part of the 50 percent local match. State in-kind donations for the preparation of Recovery Action Program may also be used as part of a local match (part of the 50 percent). Any costs for which a Federal match is sought must be well documented to provide adequate accountability for audit purposes. (b) Rehabilitation and innovation grant matching. The program provides for 70 percent Federal match for rehabilitating existing recreation facilities and areas. Seventy percent matching funds are also authorized to local governments for innovation grants which will address widespread coordination, management and access problems through innovative and cost effective approaches; as an incentive for State involvement in the recovery of urban recreation systems, the Federal government will match, dollar for dollar, State contributions to the local share of an Innovation or Rehabilitation; up to 15 percent of the approved grant. The Federal share will not exceed 85 percent of the approved grant.

Length and Time Phasing of Assistance: Construction activities in either Rehabilitation or Innovation proposals will be limited to three years or three full construction seasons, whichever is greater. Innovation proposals which consist of service or program stages (e.g., hiring or training personnel, and action/element before actually providing the recreation service) must be initiated within one year from grant approval.

POST ASSISTANCE REQUIREMENTS:

Reports: Inspection reports will be requested on completed projects assisted through UPARR. Reports are required with billings.

Audits: Audits will be conducted by the Department's office of Audit and Investigations upon completion of all work specified by the grant agreement.

Records: Maintain records to facilitate audit, including records that fully disclose the amount and disposition of assistance; the total cost of the project; and the amount and nature of that portion of the cost supplied by other sources.

Forty-one fish ladders have been constructed, one dam has been removed, and one additional fish ladder has been renovated to provide upstream passage for migrating anadromous fish. Research under a four-State project to restore Atlantic salmon and American shad in the Connecticut River has resulted in a speeded-up construction schedule for new fishways, bringing about earlier restoration of anandomous fish in upriver sections, and improvements to an existing fish lift at Holyoke, Massachusetts, that have more than doubled the number of shad lifted over this dam. The State of Washington and concerned Indian tribes have developed a computerized program for assessing the anadromous fish harvest in the Boldt decision area. Research under the program has produced a vaccine to immunize juvenile salmon and trout against a saltwater disease known as vibriosis.

OBJECTIVES: To serve as an impetus to farm pond construction and water conservation; to supply high-protein food.

TYPES OF ASSISTANCE: Sale, Exchange, or Donation of Property and Goods.

USES AND USE RESTRICTIONS: Fish are supplied to stock new or reclaimed farm and ranch ponds. Fish are not available for ponds which are less than one-quarter acre in size, subject to any form of commercialization, or apparently biologically incapable of sustaining fish life. Channel catfish are stocked on a one-time basis only.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Individuals who own suitable ponds are eligible to receive fish. In general, eligible individually owned ponds are those created with technical and financial assistance of the Department of Agriculture.

Beneficiary Eligibility: Pond owners and public. Each applicant for fish is urged to permit controlled public fishing, in accordance with all applicable laws and regulations, in stocked ponds.

Credentials/Documentation: Applicants complete form which establishes location, size, and water quality conditions of the pond for which fish are requested.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: In some cases, applications for fish are recommended by the Soil Conservation Service county or district agent.

Application Procedure: Application Form (3-1688) is obtained from the local soil conservation field offices, the Fish and Wildlife Service's Washington or regional offices and returned to the appropriate FWS regional office on completion.

Award Procedure: Fish are stocked in farm ponds, when available, after other higher priority programs have been met applicants are notified by postcard of time and date for fish deliveries.

Deadlines: None. However, in some areas, applications received after July 1 cannot be filled until the following year because of hatchery production schedule.

Range of Approval/Disapproval Time: 60 to 90 days.

Appeals: Not applicable.

Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Not applicable.

Length and Time Phasing of Assistance: Approved applications are usually filled within 6 to 9 months.

POST ASSISTANCE REQUIREMENTS:

Reports: None by recipients. Fish and Wildlife Service, State agency, or other organization may conduct special survey of farm ponds in certain locations to determine impact on general sport fishing activity.

Audits: Applications are routinely checked to determine if pond has been stocked previously.

Records: None.

FINANCIAL INFORMATION:

Account Identification: 14-1611-0-1-303.

Obligations: (Salaries and expenses) FY 79 $525,000; FY 80 $551,000; and FY 81 est $578,000.

Range and Average of Financial Assistance: $2 to $94; $18 (value of fish donated).

PROGRAM ACCOMPLISHMENTS: Approximately 21,023 farm ponds averaging about 2.6 acres in size were stocked in fiscal year 1979. As part of the national sport fishery, farm ponds have supported more than 50 million angler days of fishing annually and it is estimated that about one-fourth of this fishery has been supported by the Federal Farm Pond Program.

REGULATIONS, GUIDELINES, AND LITERATURE: None.

INFORMATION CONTACTS:

Regional or Local Office: See Catalog address appendix.

Headquarters Office: Fish and Wildlife Service, Department of the Interior, Washington, DC 20240. Telephone: (202) 343-2197. Contact: Robert W. Thoesen, Chief, Division of National Fish Hatcheries.

RELATED PROGRAMS: 15.604, Fishery Research, Information; 15.605, Fish Restoration; 15.608, Sport Fish Technical Assistance.

EXAMPLES OF FUNDED PROJECTS: 100 channel catfish stockd in 1 acre privately-owned pond. There are 50 largemouth bass, and 500 bluegill, stocked in 1 acre privately-owned pond. There are 75 largemouth bass, 75 channel catfish, 525 bluegill, and 225 redear sunfish stocked in 1 1/2 acre pond. There are 200 channel catfish stocked in 2 acre pond. There are 25 channel catfish stocked in 1/4 acre pond.

CRITERIA FOR SELECTING PROPOSALS: The Service participates in the farm pond program by providing the appropriate species of fish, free of charge, to individuals owning ponds developed under the Soil Conservation Service's pond program. Ponds constructed under other programs and privately-constructed ponds are also considered for stocking. The program functions in the 48 contigious States with major emphasis in those of the Southeast. At the present time, the Service stocks only fingerling warmwater fish (largemouth bass, bluegill, redear sunfish, and channel catfish in ponds administered under the farm pond program. Only those ponds considered by qualified biologists (Federal or State) as suitable for sustaining fish populations will be stocked. If a pond is commercialized, already contains fish, or is less than 1/4 acre in size, it does not qualify for stocking and the application is rejected. State stocking policies are given precedence over Service requirements in instances where State standards are more restrictive. Service participation is presently limited to the initial stocking of farm ponds. If subsequent stockings are necessary, the pond owner must obtain his fish from other sources or a commercial dealer. When proper management dictates the reclaiming of a pond by draining or the removal of all fish by chemical means, the pond may be considered new and the owner may request an initial stocking of fish. Current production from National Fish Hatcheries generally is not sufficient to meet priority needs for stocking waters on Federal, Indian, and State lands open to the public for fishing. The Service's Regional personnel review each application on fish stocking and advise each pond owner as to availability of fish for stocking in private waters. If fish cannot be supplied from a National Fish Hatchery, The Regional Office may provide assistance in locating commercial sources for fish.

OBJECTIVES: To map the Nation at appropriate scales in accordance with established standards and maintain the maps in up-to-date condition.

TYPES OF ASSISTANCE: Provision of Specialized Services; Dissemination of Technical Information.

USES AND USE RESTRICTIONS: The Geological Survey does not have a program of direct financial assistance for surveys and mapping but does perform work on cooperative projects which contribute to the National Mapping Program. The technical information and maps produced in cooperatively financed survey and mapping project provide basic information for the effective planning of programs for development and management of natural resources and the efficient planning and operation of interrelated projects at Federal, State, and local levels. There are no restrictions on the use of the information.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Not applicable.

APPLICATION AND AWARD PROCESS:

In fiscal year 1980, it is estimated that the standard quadrangle mapping coverage of the country will total about 98 percent with the production of 67,000 square miles of mapping, the equivalent of 1,175 standard quadrangle maps. Additional production in 1979 includes the revision of 1,800 maps, comprising 103,000 square miles, revision or completion of 40, 1:250,000-scale and special-format maps, such as maps of the individual States and maps of National Parks and Monuments, preparation of 3,900 othophotoquads, and preparation of about 480, 1:100,000 and 1:50,000 intermediate scale maps. PROGRAM ACCOMPLISHMENTS: During fiscal year 1979, activities in the enforcement area included investigations, motions, briefs and hearings on issues such as: continued operation of segregated schools; new construction and school closings affecting the desegregation process; student segregation within schools, etc. During the fiscal year, the Division participated as amicus curiae in the two major Supreme Court cases, involving the Dayton and Columbus, Ohio school districts, in which the Court reinforced the requirements for full desegregation of northern and western school districts which had practiced unlawful segregation. Both before and after these decisions, the Division was active in several lawsuits seeking desegregation of similar districts. In another case in which the Division participated as amicus curiae, a decision was rendered requiring major desegregation of the Cleveland, Ohio school district. In a suit brought against Indianapolis, Indiana the district court ordered desegregation between the city and several suburban districts; implementation of this order has been stayed pending appeal. As plaintiff-intervenor in a Seattle, Washington case the Division successfully argued that a State statute limiting the use of various desegregation techniques was unconstitutional. A favorable decision in the Division's case in Omaha, Nebraska resulted in a finding that system-wide desegregation and continued implementation of a major desegregation plan was required. In a suit involving St. Louis, Missouri, after the district court rejected the Section's claim that a new desegregation plan was necessary; the decision was reversed by the Court of Appeals. New investigations of school segregation in several other major northern and western metropolitan areas were also initiated during the year. The Division continued to represent the United States in Lawsuits involving more than 500 southern school districts, most of which operate under desegregation plans which the Section monitors. During the past year the Division conducted litigation against a number of these districts which had not fully desegregated their schools. This resulted in district court orders requiring further desegregation in Marengo County, Alabama, Conway County, Arkansas, Decatur, Alabama, Conecuh County, Alabama, and Harrison County, Mississippi. Cases involving Tuscaloosa, and Linden, Alabama, and Valdosta, Georgia resulted in orders requiring further desegregation, but because these orders did not fully desegregate the schools, appeals have been taken. In cases involving Austin and Houston, Texas, and Monroe, Louisiana trials were were conducted concerning the nature and extent of further required desegregation. In Lubbock, Texas, an appeal resulted in a decision which remanded the case for further consideration of desegregation of the remaining one-race schools in that system. The Section also filed motions seeking further desegregation in Birmingham, Alabama, Baton Rouge, Louisiana, and Rapides Parish, Louisiana and notified the Port Arthur, Texas school district that a similar motion would be filed if it did not agree to desegregate its schools further. Other enforcement activity focused on segregative inter-district transfers between adjoining school districts. In cases involving Eufala, Alabama, and Red River and Natchitoches, Louisiana, the district courts entered orders enjoining continued acceptance of such transfers. In addition, the Division successfully argued that it was premature to dismiss a desegregation order in Bossier Parish, Louisiana. Efforts to desegregate racially separate systems of higher education were also continued during the year. The Division gained a major court of appeals decision in the case involving Tennessee's system which affirmed a district court order requiring the merger of historically black Tennessee State University and the Nashville campus of the University of Tennessee, with Tennessee State being the surviving institution after merger. The Division was successful in defending a case brought by the State of North Carolina to enjoin HEW from proceeding administratively against that State's system of higher education, thus allowing HEW to continue its efforts to bring North Carolina into compliance with higher education desegregation requirements. Increased activity in pending cases against the Mississippi and Louisiana higher education systems should result in trials during the next year. Major investigations concerning vocational schools in other States are underway. The Division reorganized its priorities to place greater emphasis on educational opportunity: sex discrimination in education, and racial discrimination resulting from implementation of State competency laws and regulations.

PROGRAM ACCOMPLISHMENTS: During the past year the Department of Justice filed seven new affirmative lawsuits (two of which were filed against eight agencies in a large Southern State covering 40,000 employees) and defended the Department of Labor in six new suits. Several court orders and consent agreements were obtained in previously filed lawsuits which provided relief in the form of hiring and promotion goals and back pay. Of particular note was a settlement with a trucking company whereby $2.74 million was obtained for 82 individuals, the largest per person settlement ever obrained in any equal employment opportunity, class action type litigation. Similarly, through settlement of an executive order defense suit brought against the Department of Labor by a rubber tire company denied Federal contracts for noncompliance, over $5 million in back pay and an almost equal amount of pension benefits were obtained for a class of about 500 women. In addition, active investigations were being pursued against large school districts, private industries and several State police forces on a regional basis. Administratively, the Department of Justice issued 4000 "Right to Sue Notices" in response to referrals from the Equal Employment Opportunity Commission as well as in response to requests from individual charging parties.

16.103 FAIR HOUSING AND EQUAL CREDIT OPPORTUNITY

OBJECTIVES: To provide freedom from discrimination on the basis of race, color, religion, sex or national origin in connection with the sale, rental, and financing of housing and other related activities. (Fair Housing Act). The Equal Credit Opportunity Act prohibits discrimination in credit transactions on the basis of race, color, religion, national origin, sex, marital status, or age (provided the applicant has the capacity to contract,) because all or a part of the applicant's income is derived from a public assistance program, or because the applicant has in good faith exercised any right under the Consumer Credit Protection Act.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: Title VIII of the Civil Rights Act of 1968 is designed to assure freedom from discrimination in the sale, rental and financing of housing and other related activities. A private suit alleging discrimination may be filed in the appropriate Federal or State court. The Attorney General is authorized to bring civil actions in Federal courts when he has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of discrimination or when he has reasonable cause to believe any group has been denied such rights in a case of general public importance. The E.C.O.A., as amended, is designed to prohibit discrimination in all aspects of credit transactions on a prohibited basis. Persons who believe that they are victims of such discrimination may file complaints with one of the appropriate Federal regulatory agencies or may bring the information to the attention of the Attorney General. The Justice Department is authorized to institute litigation in Federal Courts when a matter is referred to the Attorney General by an agency responsible for administrative enforcement of the Act or when he has reasonable cause to believe that one or more creditors are engaged in a pattern or practice in violation of the Act. In addition, an aggrieved person may institute suit in Federal court and in such cases, punitive damages in an amount not to exceed $10,000 in addition to actual damages, or in the case of a class action a maximum of the lesser of $500,000 or one per centum of the net worth of the creditor, may be granted by the court.

PROGRAM ACCOMPLISHMENTS: During fiscal year 1979, the Division filed 26 suits and 2 motions for contempt and/or supplemental relief under the Fair Housing Act. These actions were taken in cases in 18 different states, and potentially affect about 15,000 units of housing. Twenty-one of these cases involved discriminatory rental or sales practices by the owners or oprators of apartments, rental services, trailer parks, or residential or recreational developments. Most of the 21 cases involved racial discrimination; five involved sex discrimination; four involved national origin discrimination (against Chicanos, Iranians, and Pakistanis); and one involved religous discrimination. In addition, four cases alleged racial discrimination by public housing authorities; two alleged racial steering and blockbusting; and one alleged racial intimidation and interference by neighbors. Also during fiscal year 1979, consent decrees were entered in 18 housing discrimination cases (eight of which had been commenced in prior years). Several of the new cases filed during the year involved novel issues. A suit against an Alabama public housing authority challenged the use of a residency requirement as a prerequisite for admission to tenancy where the authority is located in a city that is virtually all-white. A suit against a Florida real estate broker challenged the use of the"farming" technique of uninvited solicitations, where it was used in a racially changing subdivision with a prior history of blockbusting activity. A suit against a Colorado landlord challenged the use of a citizenship requirement which had the effect of discriminating against Iranians on the basis of their national origin, as well as another practice which had a discriminatory effect upon Chicanos. A Pennsylvania suit challenged the use of a scoring system for rating prospective tenants which discounted wives' incomes and length of employment. Another of the new cases filed alleging racial discrimination was based in part on "testing" evidence from a program conducted by the National Committee Against Discrimination in Housing under a contract with the Department of Housing and Urban Development. In two noteworthy cases in Arkansas, public housing authorities charged with racial discrimination intenant assignment agreed to consent decrees which provide opportunities for transfers of incumbent tenants, and for future assisgnments to be made on a racially integrative basis. This relief was designed to overcome the effects of past discrimination in the most expeditious fashion possible. In a case filed less than two weeks after an emergency situation came to the Section's attention, a preliminary injunction was obtained restraining an Atlanta landlord from evicting or failing to renew the leases of Iranian tenants because of their national origin. Siginificant appellate matters in the housing area included a favorable ruling in the Supreme Court, in a case in which the United States participated as amicus curiae, on private parties' standing to sue under the Fair Housing Act to challenge steering practices; a favorable ruling in the Section's suit against the City of Black Jack, Missouri, on the city's obligation to take affirmative steps to assist in the development of multi-racial low cost housing and an unfavorable court of appeals decision on the question of the United States' authority under Title VIII to seek relief in the form of damages for victims of discrimination. Also during fiscal year 1979 an extensive field investigation was carried out by a Hispanic Discrimination Task Force to document possible discrimination in housing which the Section could address by litigation. While the results of this investigation were disappointing, in that no litigable cases were discovered, the community contacts which resulted were helpful and may lead to information that will warrant litigation. During the 1979 fiscal year, the Division brought five cases under the Equal Credit Opportunity Act (ECOA). The dedendants included creditors who have nationwide operations and who collectively process several million credit applications each year. In one suit alone the defendant operates over 2,000 branch offices and receives approximately 4,000,000 credit applications annually. Complaints were based on alleged discriminatory conduct relating to age, sex, or marital status discrimination, or failure to provide credit applicants with adequate reasons for adverse action. One complaint also charged a creditor with discriminating against applicants because all or part of their income was derived from a public assistance program. In addition, the Section filed two amicus curiae briefs in private ECOA cases, one of which led to a ruling that a practice which had a discriminatory effect would violate the Act. In the past year four ECOA cases were resolved through the entry of consent decrees.

16.104 PROTECTION OF VOTING RIGHTS

FEDERAL AGENCY: CIVIL RIGHTS DIVISION, DEPARTMENT OF JUSTICE

AUTHORIZATION: Voting Rights Act of 1965; Public Law 89-110; 42 U.S.C. 1973, as amended by Voting Rights Act Amendments of 1970 and 1975; Public Law 91-285 and Public Law 94-73; 42 U.S.C. 1971; 42 U.S.C. 1974; Overseas Citizens Voting Rights Act of 1975, Public Law 94-203, 42 U.S.C. 1973dd.

OBJECTIVES: To provide protection of an individual's right to register and vote in all local, State and Federal elections without discrimination on account of race, color, a membership in a language minority group or age, and to assure the vote in Federal elections to United States citizens residing overseas.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: Under the Voting Rights Act of 1965, as amended in 1970 and 1975, no voting standard qualification, prerequisite or procedure may be imposed or applied by any State or political subdivision to deny or abridge the right of any U.S. citizen to vote on account of race or color or because an individual is a member of a language minority group. Certain specially covered States and political subdivisions are required to submit any proposed voting changes either to the District Court for the District of Columbia for a declaratory judgment that the changes do not have the prohibited purpose or effect, or, in the alternative, to the U.S. Attorney General who has 60 days in which to object to the proposed change. No proposal to which the Attorney General has objected may be put into effect pending withdrawal of the objection or a subsequent declaratory judgment by the District Court for the District of Columbia. The Attorney General may send Federal voting examiners and observers to certain designated counties when he considers their presence necessary to enforce the Fourteenth and Fifteenth Amendments. The 1970 Amendments (1) supend the use of literacy and other tests in all States and counties not previously covered by the 1965 Act; (2) set forth uniform standards regarding durational residency requirements and absentee registration and balloting in Presidential elections; and (3) lower to 18 the minimum age for voting in Federal elections. The 1975 Amendments permanently ban the use of literacy and other such tests, and require the conduct of bilingual elections in certain jurisdictions having more than 5 percent citizenry of a single non-English language group. It is noted that 42 U.S.C. 1971 prohibits with-holding the right to vote on account of racially based distinctions, bans the application of registration or voting requirements different from those applied to persons already registered or permitted to vote, and prohibits the denial of the vote to any individual, under the Fifteenth Amendment, because of an error or omission which is not material in determining whether the person is qualified to vote. Also, 42 U.S.C. 1974 allows the Attorney General or his designee access to records for Federal elections for specified periods of time. Under the Overseas Citizens Voting Rights Act, 42 U.S.C. 1973dd, the Attorney General may institute judicial proceedings to enforce the Act's guarantee to U.S. citizens living outside of the U.S. of the right to vote in Federal elections.

PROGRAM ACCOMPLISHMENTS: During fiscal year 1979, the Division's voting rights litigation efforts focused primarily on twenty-two cases of which seven were new cases. The twenty-two cases consisted of seven where the use of apportionment plans of electoral methods were directly challenged as diluting minorities' voting rights, fourteen to enforce the pre-clearance requirements of Section 5, and one in which an attempt by the State of Alaska to terminate its special coverage under the Voting Rights Act ultimately resulted in a voluntary dismissal by the State. Among these cases were five where the decisions of Federal district courts presaged the end to fourteen years of litigation in Mississippi over redistricting plans. Orders by two courts in separate but related cases involving racially based challenges to Mississippi's State legislative districts cleared the way for that State's 1979 elections, and action in three other separate but related cases set the stage for the first legally enforceable elections since 1967 under a racially fair districting plan in Warren County, Mississippi. The State legislative districting of Mississippi had been in litigation since 1965, and the districting of Warren County had been in dispute since an objection was interposed by the Attorney General to the county's initial redistricting plan in 1971. Also nearing an end was litigation begun in 1976 involving the City of Rome, Georgia, where the Division obtained another district court order that refuses to weaken the force of Section 5 or to find that the Voting Rights Act is unconstitutional as the city urged in this litigation over a Section 5 objection to the city's attempt to impose new racially restrictive requirements on the voting process and to dilute minorities' voting rights. Among other judicial decisions during the year, courts upheld the Division's decisions that an independent Section 5 review by the Attorney General was required by a Dallas, Texas, reapportionment even though it had been judicially found to be constitutional, and held that Houston, Texas, could not allow persons in virtually all-white annexed areas to effect city elections until the city first complied with Section 5 submission procedures and then took steps to modify city election procedures to cure the dilutive impact on minorities' voting rights that caused the Attorney General's objection to the voting changes occasioned by the annexations. In addition, the Department filed the first case to enforce the language minority provisions of Section 203 of the Voting Rights Act, a case which was prepared and filed by the San Francisco U.S. Attorney's office with advice and guidance from the Division, where preliminary court decisions mandated the city to provide bilingual materials and assistnce to Chinese and Spanish speaking citizens and provided the certification necessary for the assignment of Federal observers during the city's November 1978 election. In fiscal year 1979, 1,914 submissions involving a total of 3,420 voting-related changes were submitted to the Attorney General under Section 5. Objections were entered to twenty-three submissions, including an objection to Mississippi legislation (an open primary law) that would have eliminated one of the few positions in which minorities are represented as county-level officials responsible for the election process and would have significantly reduced minorities' opportunities to elect candidates of their choice; an objection to another Mississippi law that would have seriously restricted the ability of minority voters to gain assistance in casting their ballot; and an objection to the voting effect of annexations to Houston, Texas, a matter that the city resolved by adopting fairly drawn single-member districts for the election of 9 out of 14 city council members, a system which replaces one which elected 9 members at-large prior to our objection. Under provisions of the Voting Rights Act which authorize the Attorney General to assign observers to monitor elections to ensure that the right to vote and to have the vote properly counted is not denied during the election process, 972 observers were assigned to cover nine elections in five States, including elections in three of four counties that were initially certified by the Attorney General during fiscal year 1979. Observers at the 1978 general election in San Francisco, California, were assigned following the first certification of a county made by a Federal court under Section 3 of the Voting Rights Act in a lawsuit brought under the language minority provisions of Section 203 of the Act. The total number of Federal observers assigned during the 1979 fiscal year is the third largest number of observers to cover elections in any single fiscal year during the past decade. Nearly two-thirds of the Federal observers in fiscal year 1979 were assigned for the 1979 primary and primary run-off elections in the State of Mississippi. Administrative actions included an enlargement and major reorganization of the paraprofessional unit that processes and analyzes Section 5 submission. This reorganization was designed to improve Section 5 preclearance efficiency by streamlining the unit's management functions and administrative processes, and improve preclearance effectiveness by providing greater coordination with the Division's litigation activities and by enhancing the professional development of the unit staff. In other administrative actions the Division instituted modifications in the Federal observer program designed to improve election day communications among Federal personnel and to provide greater flexibility in conducting election day activities. In addition, the Division contributed to the Federal Election Commission's efforts to provide election administrators with a report on the language minority provisions of the Voting Rights Act and a Division representative participated in workshops sponsored by the Commission to inform election administrators about Federal laws regarding absentee voter registration and balloting and the Division worked with the staff of the Department of Defense's Federal Voter Assistance Program in their efforts to gather and prepare information for dissemination as required by the Overseas Citizens Voting Rights Act and the Federal Voters Assistance Act.

OBJECTIVES: To establish and improve State antitrust enforcement capability.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: The program utilizes a mixture of approaches to enhance the in-house antitrust enforcement capability of State attorneys general. In most cases, the initial step required is for applicants to hire and train State-employed attorneys and support staff. Some States also may need to develop comprehensive information systems, advanced training or more sophisticated investigation tools. This program is not to be used as a means to substitute Federal funding for existing State funding. In addition, the applicant must ensure that any attorneys or support personnel employed or retained with funds provided by this program enforce State or Federal antitrust laws.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State attorneys general may apply for funding under this program.

Beneficiary Eligibility: The entire population of a State receiving funding are the ultimate potential beneficiaries of the program.

Credentials/Documentation: Costs will be determined in accordance with FMC 74-4 for State and local governments.

APPLICATION AND AWARD PROCESS:

Audits: Periodic audits should be made as part of the recipient's system of financial management and internal control to meet terms and conditions of grants and other agreements.

Records: Not applicable.

FINANCIAL INFORMATION:

Account Identification: 15-0319-0-1-752.

Obligations: (Grants) FY 79 $10,000,000; FY 80 est $10,000,000; and FY 81 est Not available.

Range and Average of Financial Assistance: $12,000 to $385,000; $220,000.

PROGRAM ACCOMPLISHMENTS: The grants to aid State antitrust enforcement have more than doubled the number of State antitrust enforcers. For about twenty-five States, not previously involved in antitrust enforcement, the funding created a two or three-attorney antitrust office for the first time. For States already involved in antitrust activity, the grant funds have been used to fund computerization of State bidding, automated data retrieval systems for litigation support, and additional staff. The result of the grant activity will be closer scrutiny of local business activity than existed prior to the grant awards. There were forty five applications, and forty-five States were awarded grants. Also, eleven States applied for supplementary funding and all were awarded supplementary grants.

EXAMPLES OF FUNDED PROJECTS: Projects that have received grant funding have included: (1) A training program at the regional and national levels to encourage State antitrust enforcement; (2) the hiring of additional antitrust attorneys, economists, and support personnel; (3) a computerized bid-monitoring system; (4) an investigation of service industry; and (5) the establishment of a State's first full-time antitrust office.

CRITERIA FOR SELECTING PROPOSALS: Primary emphasis is placed on the capacity of proposals to start or expand State antitrust enforcement programs. Criteria used for proposal selection are flexible to encompass all appropriate tools to increase State antitrust capabilities. The dollar amount associated with each grant is based, in part, on State population. Grant renewal is based on the operation of the State's antitrust office. Proposed expenditures are compared with the development and sophistication of the State's antitrust office.

CRITERIA FOR SELECTING PROPOSALS: Solicited Proposals - ETA will furnish information on selection criteria in the solicitation and other appropriate media. Unsolicited Proposals - Interested organizations should be aware of the following: (i) The amounts available for financing unsolicited proposals and applications is extremely modest. Ordinarily, funds are available for financing unsolicited proposals only as a result of spending at lower levels than those anticipated in the ETA annual funding plan. (ii) Projects which whould be operated in a single State usually are assigned a very low priority and projects which would be operated within a single CETA prime sponsor jurisdiction usually receive no priority. (iii) In order to get active consideration, a proposed project must demonstrate a strong and immediate focus on equipping unemployed, underemployed, and disadvantaged persons with skills and abilities specifically related to successful participation in the labor market, or it must otherwise clearly contribute to the accomplishment of the purposes of the Act. Proposals for funding projects which would only indirectly or incidently provide persons eligible for services under the Act with work-related skills, abilities, and opportunities will not be seriously considered. (iv) Proposals are usually deemed more attractive to the extent that they ensure that eligible individuals will have direct access to unsubsidized, stable, well-paying, and upwardly mobile jobs. (v) Projects are usually deemed more attractive to the extent that they address the employment-related needs of groups with extremely severe problems in the labor market such as handicapped persons, offenders, and others who face formidable barriers to employment.

Range and Average of Financial Assistance: Not applicable.

PROGRAM ACCOMPLISHMENTS: President's Reorganization Plan Number 1 was implemented effective October 8, 1978. The Plan consolidated the contract compliance responsibilities of 11 different compliance agencies into the Department of Labor. The consolidated organization has direct enforcement responsibility for Executive Order 11246, Section 503 of the Rehabilitation Act of 1973 and Section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974. Total back pay during fiscal year 1979 was approximately $3.7 million affecting 2,160 individuals. During fiscal year 1979, there were also total financial settlements of more than $5.5 million, including a settlement made with a city bank committing the bank to more than $2 million in training, recruitment and other non-pecuniary benefits. Three companies were debarred in fiscal year 1979. Back pay awards during the first quarter of fiscal year 1980 approximated $6.2 million affecting 2,048 individuals. Approximately 1,535 complaints were received in fiscal year 1979. During the first quarter of fiscal year 1980, another 436 complaints were filed with OFCCP. During fiscal year 1979, 2,410 compliance reviews were conducted. In the first quarter of fiscal year 1980, 600 reviews were conducted. OFCCP's headquarters was reorganized into four divisions for policy, program operations, enforcement, planning and analysis. The field organization was established in the ten Federal regions. Ten Assistant Regional Administrators report directly to OFCCP's Director on programmatic matters. Seventy-one (71) area offices report directly to their respective Assistant Regional Administrators. OFCCP's field manual was distributed to the field during September of 1979, giving uniform instructions to the staff. On December 28, 1979, proposed regulation changes were published for public comment. These proposals provide the first major overhaul of the contract compliance regulations in recent years. Subsequent publications on January 22, 1980 and February 1, 1980, for public comment propose new rules on contractor payment of membership fees to private clubs and exclusion of women from the workplace because of alleged reproductive hazards. During fiscal year 1979 OFCCP published for comments proposed affirmative action goals and timetables for minority participation in the construction industry. The coverage is nationwide (a first in contract compliance history for minorities) and the goals were computed for two types of geographical units, the Standard Metropolitan Statistical Area (SMSA) and the Economic Area (EA). There are 285 SMSAs and 183 EAs in the United States. Nationwide goals and timetables for women were established during fiscal year 1978.

Upon final issuance, every non-exempt Federal and federally-assisted construction contracting firm in the United States would be committed to a precalculated, numerical affirmative action goal for women and minorities in its total construction workforce. A higher quality compliance review, which now routinely includes an affected class analysis, diminishes the total number of reviews completed. However, nearly 4,000 actions of all types were completed in fiscal year 1979. OFCCP expects to increase this activity in fiscal year 1980 to approximately 6,000 completed actions. Strides were made in very difficult areas, such as the employment of women in coal mines. This advancement resulted from breaking down of walls of superstition and long standing, rigid, unyielding policies against women in coal mines. Persons close to this problem view OFCCP's progress in the mining industry as being very significant.

17.303 MINIMUM WAGE AND HOUR STANDARDS

(Federal Wage—Hour Law)

FEDERAL AGENCY: WAGE AND HOUR DIVISION, EMPLOYMENT STANDARDS ADMINISTRATION, DEPARTMENT OF LABOR

AUTHORIZATION: Fair Labor Standards Act; Public Law 75-718, as amended; 29 U.S.C. 201-219; 29 CFR, Chapter V. Walsh-Healey Public Contracts Act; Public Law 74-846, as amended; 31 U.S.C. 35-46; 41 CFR 50-201. Service Contract Act of 1965; Public Law 89-286, as amended; 41 U.S.C. 351 et seq.; 29 CFR 4. OBJECTIVES: To provide standards protecting wages of working persons by requiring a minimum hourly wage rate and overtime pay. Additional standards apply to child labor.

TYPES OF ASSISTANCE: Advisory Services and Counseling; Investigation of Complaints.

USES AND USE RESTRICTIONS: Federal wage and hour standards apply generally to employees engaged in interstate or foreign commerce or in the production of goods for such commerce or in enterprises so engaged. For covered employment the minimum hourly wage is $3.10 ($3.35 per hour beginning January 1, 1981), with time and one-half required for hours worked over 40 in a work week. To the extent necessary to prevent curtailment of employment opportunity, certificates authorizing special minimum wage rates are issued for learners, handicapped workers, full-time students, student workers, and apprentices. Failure to comply with the child labor provisions of the Fair Labor Standards Act may result in an assessment of a civil money penalty not to exceed $1,000 for each violation. Employees of contractors performing on most federally financed or assisted construction projects, or providing services under contract to Federal agencies, are subject to special standards. These special standards require that employees receive no less than the wages and fringe benefits prevailing in the locality as determined by the Secretary of Labor, and that daily and weekly overtime compensation be paid. The standards apply to performance on direct Federal contracts and also to most construction projects financed in whole or in part by the Federal Government (e.g., projects under the Revenue Sharing Act of 1972 and National Housing Act). For Federal and federally assisted construction and Federal service contracts subject to prevailing wage requirements, contracting agencies must request a wage determination from the Wage and Hour Division.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any covered employee, unless specifically exempt, is entitled to be paid in accordance with applicable monetary standards in the United States, District of Columbia, Puerto Rico, Virgin Islands, American Samoa, Guam, Wake Island, Eniwetok Atoll, Kwajalein Atoll, Johnston Island, Canal Zone, and the Outer Continental Shelf Lands defined in the Outer Continental Shelf Lands Act (Geographic application varies under the respective statutes and eligibility is dependent upon specific statutory language). For U.S. supply contracts over $10,000, contractor must be eligible as a manufacturer or regular dealer (41 CFR 50-201.101).

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Not applicable.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: Persons having knowledge of wage and employment practices which are not in compliance with the minimum standards of these acts, and persons requesting additional information concerning these standards, are encouraged to write, telephone, or visit the nearest Wage and Hour Division Office listed in the appendix. Information should be provided describing the type of business and the nature of the work performed. Unless otherwise authorized, the names of persons making inquiries are treated in complete confidence. For Federal construction contracts or Federal service contracts subject to prevailing wage requirements, the contracting agency must request a wage determination from the Wage and Hour Division. The wage determination must be furnished to bidders and is made a part of the contract.

Award Procedure: Not applicable.

Deadlines: For most of the Acts, 2 year statute of limitations applies to the recovery of back wages; in the case of willful violations a 3 year limitation applies.

17.306 CONSUMER CREDIT PROTECTION

(Federal Wage Garnishment Law)

FEDERAL AGENCY: WAGE AND HOUR DIVISION, EMPLOYMENT STANDARDS ADMINISTRATION, DEPARTMENT OF LABOR

AUTHORIZATION: Consumer Credit Protection Act, Public Law 90-321, 15 U.S.C. 1671-1677, as amended by Public Law 95-30, effective June 1, 1977.

OBJECTIVES: To provide restrictions on the amount of an employee's wages or salary which may be garnished, and prohibit employers from discharging employees by reason of garnishment for any one indebtedness.

TYPES OF ASSISTANCE: Advisory Services and Counseling; Investigation of Complaints.

USES AND USE RESTRICTIONS: The general rules for applying the Federal restrictions on garnishment, effective January 1, 1980, are: (1) If an individual's weekly disposable earnings are $93.00 or less, no amount may be garnished; if the weekly disposable earnings are more than $93.00 but less than $124.00 only the amount in excess of $93.00 may be garnished; if the weekly disposable earnings are in excess of $124.00, 25 percent of disposable earnings may be garnished. The Act, as amended, limits court orders for the support of any person to 50 percent of the disposable earnings of an individual having a second spouse or dependent children and to 60 percent of disposable earnings if not supporting a second spouse or dependent children plus an additional 5 percent in each situation if there are outstanding arrearages over twelve weeks old. The order must be issued by a court of competent jurisdiction or in accordance with an administrative procedure, which is established by State law, which affords substantial due process, and which is subject to judicial review. The restrictions do not apply under Federal bankruptcy proceedings for wage-earners, nor do they apply to debts due for State or Federal taxes. In addition, garnishments issued under the laws of any State may be exempted from the operation of the Federal law where the Secretary of Labor determines that such laws provide substantially similar restrictions. Under no circumstances may an employee be discharged from his employment by reason of garnishment for any one indebtedness, although State laws may provide additional protection.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any person whose earnings have been subjected to garnishment is entitled to the protections provided by the Act in the United States, the District of Columbia, Puerto Rico, the Virgin Islands; outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act (ch. 345, 67 Stat. 462); American Samoa, Guam, Wake Island; Eniwetok Atoll; Kwajelein Atoll; Johnston Island; and the Canal Zone. Under the law earnings are defined as compensation paid or payable for personal services, whether denominated as wages, salary, commission, bonus or otherwise, including periodic payments pursuant to a pension or retirement program.

Beneficiary Eligibility: None.

Credentials/Documentation: None.

APPLICATION AND AWARD PROCESS:

19.200 CLAIMS AGAINST FOREIGN GOVERNMENTS

(International Claims)

FEDERAL AGENCY: OFFICE OF THE LEGAL ADVISER, DEPARTMENT OF STATE

AUTHORIZATION: Authority to act is based upon the powers and duties delegated to the President under Section 3 of Article II of the Constitution of the United States and therefrom to the Secretary of State. There is no statute.

OBJECTIVES: To obtain settlements of all legally valid claims of nationals of the United States against foreign governments. A claim may result from any one of a number of situations in which a national of the United States may be injured by a foreign government in violation of international law. It can, for example, be based upon a taking of property without payment of prompt, adequate and effective compensation; other acts or omissions of governmental organs incompatible with international obligations; acts of individuals, insurgents and mobs under circumstances establishing a lack of due diligence on the part of government officials, etc.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: The Government of the United States, at the discretion of the Secretary of State, will act on behalf of U.S. nationals in attempting to settle claims against foreign governments. Assistance is not available: (1) to non-nationals, (2) in cases where there has not been an exhaustion of all local administrative or judicial remedies with a resulting denial of justice, or (3) where the respondent government is not responsible under international law. If the claim is found to be valid by the State Department and the Secretary of State chooses to back the claim, the claimant will be informed as to how the claim should be prepared and documented. The State Department, using the documentation prepared by the claimant, would then act on behalf of the claimant in pressing for settlement. Settlements (compensation or restitution) result either from direct negotiation through diplomatic channels or from arbitration, which lead to payment by the foreign government.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: An applicant must have been a United States national at the time the claim arose and must show international responsibility of the respondent government.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: The claimant must furnish evidence establishing his United States nationality, the principle(s) of international law giving rise to an obligation on the part of the foreign government, and the facts and circumstances of the case.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Potential applicants are invited to discuss possible claims prior to submitting documentation.

Application Procedure: Initial inquiries relating to claims based upon loss of or damage to property should include the following information: (1) date and manner in which claimant became a national of the United States; (2) full description of the property in question and its exact location when loss occurred; (3) date and manner of acquisition of claimant's ownership of the property or other interest therein; (4) the action taken against the property which is considered as giving rise to a claim against a foreign government; (5) identification of laws, decrees, governmental agencies and officials taking the property, and the date the action was taken; (6) the nature and amount of damage. Initial inquiries relating to claims based upon personal injury or loss of life should include a statement of facts relating to: (1) American nationality of the claimant, unless claim is based upon loss of life in which case the American nationality of both the claimant and the deceased must be established; (2) the relationship of the claimant to the deceased in death cases; (3) time, place, and circumstances under which the injury or death occurred, including the identity of persons, officials, or agencies causing the injury or death; and (4) nature and extent of damages sustained.

Award Procedure: The Secretary of State, acting in behalf of the claimant, will make the final determination. If the Secretary of State chooses to represent the claimant, the claimant will be informed of how to prepare the case. Actual payments of claims are the responsibility of the respondent government, not the State Department.

Deadlines: Unlimited, unless provisions of international law establish limits on the time allowed for filing a particular claim (laches).

20.205 HIGHWAY RESEARCH, PLANNING, AND CONSTRUCTION

(Federal—Aid Highway Program)

FEDERAL AGENCY: FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

AUTHORIZATION: Title 23 U.S.C., "Highways"; Federal-Aid Highway Act of 1973, Public Law 93-87; Federal-Aid Highway Amendments of 1974, Public Law 93-643; Federal-Aid Highway Act of 1976, Public Law 94-280; Surface Transportation Assistance Act of 1978, Public Law 95-599.

OBJECTIVES: To assist State highway agencies in constructing and rehabilitating the Interstate highway system and building or improving primary, secondary, and urban systems roads and streets, to provide aid for their repair following disasters, and to foster safe highway design; and to replace or rehabilitate unsafe bridges. Also provides for the improvement of some highways in Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands.

TYPES OF ASSISTANCE: Formula Grants (Apportionments); Project Grants.

USES AND USE RESTRICTIONS: Depending on which aspect of the program funds are applied to, they may be used for planning, surveying, research, engineering, right-of-way acquisition, new construction, reconstruction, repair, improvement, restoration, rehabilitation, resurfacing, roadside beautification, and recreation. Funds may be applied to highways, bridges, bikeways, pedestrian walkways, fringe and corridor parking facilities, and rest areas. All capital projects in urban areas of more than 50,000 population must be based on a continuing comprehensive planning process. These funds cannot participate in any maintenance activities, such as pothole patching. Some county and local roads and streets may be part of a Federal-aid system and are eligible for improvement, but only through State highway agency coordination and action. Selected Interstate and non-Interstate authorizations may be used for mass transit capital improvements at the request of State and local governments. Special programs for highway safety, bridge reconstruction, and railroad grade crossing protection are also available for roads both on and off Federal-aid systems. This program is eligible for joint funding but the initiative lies with the State Highway Agency. The State Highway Agency is responsible for reviewing and rejecting or approving on a final basis specific State projects. JOINT FUNDING: This program is considered suitable for joint funding with closely related Federal financial assistance programs in accordance with the provisions of OMB Circular No. A-111. For programs that are not identified as suitable for joint funding, the applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State highway agencies. Projects related to forest and public lands highway, certain projects in urban areas, or projects off the State highway systems may be proposed by counties and other political subdivisions or agencies through the State highway agencies. Territorial highway projects are funded in the same manner as other Federal-aid highway projects, with the territorial highway agency functioning as the State highway agency.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Costs will be determined in accordance with FMC 74-4 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Federal-aid secondary projects must be selected in cooperation with local officials. Urban System projects must be selected by local officials with concurrence of the State. Applications are subject to State and areawide clearinghouses review pursuant to procedures in Part I, Attachment A of OMB Circular No. A-95 (revised). An environmental impact assessment is required for this program.

Application Procedure: State highway agencies submit a program of desired projects to the State-level office of the Federal Highway Administration; for projects related to forest highways, submissions are made to the Regional Federal Highway Administrator.

Award Procedure: In general, the State level office of FHWA makes final decision to approve, hold or reject individual projects; however, some projects are approved at the FHWA Headquarters or Region level Offices. Notification of awards occurs at time of apportionment or allocation of funds rather than at time of project approval and must be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082. There are several categories where limited assistance is allocated at the discretion of the Secretary of Transportation. Candidate projects are usually solicited around the start of the fiscal year and must be submitted by the State highway agencies.

Deadlines: None.

Range of Approval/Disapproval Time: Five days to five months.

Appeals: None.

Renewals: None.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Formulas where applicable based on factors such as ratio of population, area and road mileage in a single State to the totals for all states, in such proportions as applied by law for the primary, secondary, and urban systems and various categorical programs. Interstate completion formula is based on the cost to complete the remainder of the system or a minimum percentage. The formula for forest highways is based on the area and value of the national forest lands in each State. Some categories, plus part of the Interstate, primary, and bridge funds, are distributed on an as-needed basis. The normal Federal share is 90 percent for Interstate and safety projects, 80 percent for bridge replacement and rehabilitation, and 75 percent for most other projects. The Federal share is increased in the case of states with large areas of public lands. Some projects, including territorial highway projects, require no State matching of Federal funds.

Length and Time Phasing of Assistance: Except for the Interstate program, Federal-aid highway funds become available at the beginning of the fiscal years for which they are authorized, and must be obligated within 3 years after close of that fiscal year. Interstate funds became available 1 year prior to the beginning of the fiscal year for which they are authorized, and must be obligated by the close of that fiscal year.

POST ASSISTANCE REQUIREMENTS:

Reports: Generally, the State-level office of the Federal Highway Administration monitors State operations during highway project location, design and construction. After the project is completed State maintenance of the project is reviewed periodically.

Audits: States are expected to audit their own operations. DOT auditors evaluate the State's audit operations and perform additional audit work as warranted.

Records: Project records and documents must be retained by the State for three years following the final submission for Federal payment.

FINANCIAL INFORMATION:

Account Identification: 20-8102-0-7-401.

Obligations: (Grants) FY 79 $8,623,732,000; FY 80 est $8,850,000,000; and FY 81 est $8,850,000,000.

Range and Average of Financial Assistance: $16,708,000 to $528,132,000; $165,841,000.

PROGRAM ACCOMPLISHMENTS: In fiscal year 1978, 13,000 miles of highways were constructed, involving 8,000 construction projects. From Federal-aid funds, 3,480 bridges were constructed during 1978,900 of which were replaced or were in the process of being replaced with Special Bridge funds. It is expected that roughly the same number of miles, bridges, and projects will be completed during fiscal years 1979, 1980, and 1981 (see also Examples of Funded Projects).

REGULATIONS, GUIDELINES, AND LITERATURE: 23 CFR, "Highways."

INFORMATION CONTACTS:

Regional or Local Office: Regional or State-level offices of the Federal Highway Administration (as listed in Appendix IV) or State highway agencies.

Headquarters Office: Federal Highway Administrator, Federal Highway Administration, Washington, DC 20590. Telephone: (202) 426-0650 (use same 7-digit number for FTS).

RELATED PROGRAMS: 20.500, Urban Mass Transportation Capital Improvement Grants; 20.505, Urban Mass Transportation Technical Studies Grants; 20.507, Urban Mass Transportation Capital and Operating Assistance Formula Grants; 20.509, Public Transportation for Rural and Small Urban Areas; 20.600, State and Community Highway Safety; 23.003, Appalachian Development Highway System; 23.008, Appalachian Local Access Roads; 23.017, Appalachian Special Transportation Related Planning, Research and Demonstration Program.

EXAMPLES OF FUNDED PROJECTS: On the Interstate highway system, 365 new miles were opened to traffic in calendar year 1979. A total of 39,777 miles or 93.6 percent of the proposed Interstate System is open to traffic, with 1,690 additional miles remaining to be constructed. Over $147 million in emergency relief funding was obligated in fiscal year 1979 for the repair and reconstruction of highways and bridges damaged by disasters in recent years. During fiscal year 1979, emergency relief assistance was extended to an additional 17 disasters in 16 States. The replacement or rehabilitation of 2,100 additional deficient bridges was initiated in 1979, with $748 million of special bridge funds. Traffic signal projects funded at 100 percent of regular Federal highway funds. System improvements can result in an annual fuel reduction of 4,000 to 10,000 gallons per year per signal improved. When signal systems already exist, new timing plans to achieve better signal progression can reduce annual fuel consumption between 4,000 and 6,000 gallons. Over $1.5 billion for safety improvements to existing highways, including $500 million of special safety funds for railroad grade crossing protection, eliminating roadside obstacles, correcting high hazard locations, and improving pavement markings. Forty-one new ridesharing projects were initiated in fiscal year 1979, including carpool and vanpool matching, marketing and promotional activities.

CRITERIA FOR SELECTING PROPOSALS: To be eligible, most projects must be located on one of the designated Federal-aid systems and included in a statewide (or areawide) program of projects submitted for Federal approval. Legislative language restricts some authorization to projects on a particular Federal-aid system (Interstate, primary, secondary, urban), and other authorizations to particular types of projects (bridge replacement and reconstruction, hazard elimination, emergency relief, etc.). Proposed projects meeting these and other design, environmental, safety, etc. standards can be approved on the basis of State and local priorities within the limit of the funds apportioned or allocated to each State.

FEDERAL AGENCY: OFFICE OF REVENUE SHARING, DEPARTMENT OF THE TREASURY

AUTHORIZATION: Revenue Sharing Act, as amended by the State and Local Fiscal Assistance Act of 1972, as amended, Title I, Public Law 92-512, 86 Stat. 919; Amendments: State and Local Fiscal Assistance Amendments of 1976, Public Law 94-488, 90 Stat. 2341, et seq., 31 U.S.C. 1221.

OBJECTIVES: To provide financial assistance to State governments and general purpose local governments.

TYPES OF ASSISTANCE: Formula Grants.

USES AND USE RESTRICTIONS: Revenue sharing funds may be used by a recipient government for any purpose which is a legal use of its own source revenues pursuant to authorization of the governing body following two public hearings held specifically to permit the public to discuss: (1) possible uses of funds, and (2) a proposed use (budget) of revenue sharing funds. Notices of hearings are to be published in local newspapers at least 10 days in advance of each hearing. Recipient governments may spend revenue sharing funds for the State or local contribution to a Federal matching grant program, provided that this is acceptable to the Federal agency administering the matching grant and does not violate any State or local law.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State governments (including the District of Columbia but excluding Puerto Rico, territories, and possessions) and general purpose local governments, including the governing bodies of Indian tribes or Alaskan native villages performing substantial governmental functions, and county sheriffs' offices in the State of Louisiana. General purpose local governments are determined by the Census Bureau on the basis of the same principles used for general statistical purposes. Indian tribes and Alaskan native villages performing substantial governmental functions are determined either by the Bureau of Indian Affairs or by a State Governor.

Beneficiary Eligibility: Any person, group, or agency may seek revenue sharing funds from a recipient State or local government and must be allowed to participate in two required public hearings on the use of these funds. The final decision about how the recipient government is to use its revenue sharing funds is made by the governing body.

Credentials/Documentation: Governments must submit a Statement of Assurances (SOA) as provided by the Office of Revenue Sharing (ORS) signed by the chief executive of each recipient government certifying that funds to which it is entitled for a specific entitlement period will be expended in accordance with the Revenue Sharing Program.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: An application is not necessary to receive funds. Based upon data furnished by the Census Bureau, funds are distributed to eligible governments.

Award Procedure: Eligible recipient governments are notified directly by ORS of their entitlement amounts at the time they are sent SOA forms.

Deadlines: To qualify for revenue sharing funds for Entitlement Period 11 (fiscal year 1980), a recipient government must file a signed SOA not later than September 30, 1980. Assurance forms for Period 11 were mailed to recipient governments in August of 1979 and were due September 30, 1979.

Range of Approval/Disapproval Time: Cards acknowledging receipt of assurance forms are mailed within one month after they are received.

Appeals: Recipient governments may challenge the validity of the Census data for their government used in the formula (See Formula and Matching Requirements below) for Entitlement Period 11 until September 30, 1981.

Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Allocations to the 50 State areas are determined by either a five factor formula (population, urbanized population, per capita income, State income tax collections and tax effort) or a three factor formula (population, tax effort and relative income), whichever produces the highest amount. Within each State area, the State government receives one-third and all local governments divide the remaining two-thirds. No matching is required.

Length and Time Phasing of Assistance: Entitlement amounts are for a specific entitlement period. Entitlement Period 11 is fiscal year 1980. Funds are paid in quarterly installments. Recipient governments have two years from the end of an entitlement period to use funds received for that period.

POST ASSISTANCE REQUIREMENTS:

Reports: Recipient governments are required to respond to the annual Census Bureau General Revenue Sharing Survey, Survey of Local Government Finances and/or similar surveys conducted by a State or county agency in cooperation with the Census Bureau to report how revenue sharing funds were spent during the fiscal year.

Audits: Recipient governments, which have received $25,000 or more of revenue sharing funds for each of fiscals years 1977, 1978 and 1979, must have an independent fiscal audit of all their funds performed in accordance with generally accepted auditing standards and a compliance audit of revenue sharing funds for one of these fiscal years.

Records: Recipient governments must establish a local trust fund and deposit all revenue sharing funds and interest earned in it; maintain records sufficient to: document required reports and permit the tracing of revenue sharing funds to establish compliance with requirements; and at a minimum, maintain the same records as required for its own funds.

FINANCIAL INFORMATION:

AUTHORIZATION: Appalachian Regional Development Act of 1965; Public Law 89-4 as amended by Public Law 90-103; Public Law 91-123; Public Law 92-65; and Public Law 94-188; 40 App. U.S.C. 1-405; Public Law 95-193.

OBJECTIVES: To stimulate substantial public investments in public facilities that will start the region on its way toward accelerated social and economic development; to help establish a set of institutions in Appalachia capable of permanently directing the long-term development of the region; and on a joint Federal-State-local basis, to develop comprehensive plans and programs to help accomplish the overall objectives of Appalachian development, including meeting the special demands created by the nation's energy needs and policies.

TYPES OF ASSISTANCE: See individual Appalachian program description following for details.

USES AND USE RESTRICTIONS: Appalachian funds enable the States and local areas to develop networks of facilities and services. The individual programs following this description illustrate the types of investments that can be made. In considering programs and projects to be given assistance under this Act, and in establishing a priority ranking of the requests for assistance presented to the Commission, the Commission follows procedures insuring consideration of the following factors: (1) the relationship of the project or class of projects to overall regional development, including its location in an area determined by the State as having a significant potential for growth; (2) the population and area to be served by the project or class of projects including the relative per capita income and the unemployment rates in the area; (3) the relative financial resources available to the State or political subdivision or instrumentalities thereof which seek to undertake the project; (4) the importance of the project or class of projects in relation to other projects or classes of projects which may be in competition for the same funds; (5) the prospects that the project for which assistance is sought will improve, on a continuing rather than a temporary basis, the opportunities for employment, the average level of income, or the economic and social development of the area served by the project; and (6) no financial assistance can be used (a) to assist establishments relocating from one area to another; (b) to finance the cost of industrial plants, commercial facilities, machinery, working capital, or other industrial facilities or to enable plant subcontractors to undertake work theretofore performed in another area by other subcontractors or contractors; (c) to finance the cost of facilities for the generation, transmission, or distribution of electric energy; or (d) to finance the cost of facilities for the production, transmission, or distribution of gas (natural, manufactured, or mixed). APPLICATION AND AWARD PROCESS:

Preapplication Coordination: General Nature and Administration of Appalachian Regional Development Program. The Appalachian Regional Development program is a joint Federal-State partnership for the development of the Appalachian region. Responsibility for the development of plans and programs authorized under the Act is vested in the Appalachian Regional Commission, composed of members who are the 13 State Governors (who may appoint alternates) and a Federal Cochairman. General policies and procedures, and the allocation of Appalachian funds among the various programs and states are established by the Commission itself. Application for assistance may only be made through a State member of the Commission. The Appalachian State Alternate's Offices are the coordinators for the Governors for Appalachian investments. Preapplication conferences can determine within a few weeks if the project conforms to the State Appalachian Development Plan. The appropriate local development district director should be the first contact. The District Director or State Alternate's Offices will provide guidance on specific problems and technical assistance in the preparation of applications. (See individual Appalachian program descriptions).

Application Procedure: Applications for individual projects must be submitted through and with the approval of the State Alternate to the Appalachian Regional Commission (listed in the appendix). (See individual Appalachian program description).

Award Procedure: Upon receipt of project applications approved by the State, the Federal Cochairman determines that the project satisfies all requirements for assistance under the Act and approves the application. The basic Federal agency is then notified and in most cases administers the grants, and disburses funds. The Appalachian Regional Commission makes notification of grant award to Congressional offices, and the office of the governor of grant approval. (See individual Appalachian program descriptions).

TYPES OF ASSISTANCE: Federal Employment.

USES AND USE RESTRICTIONS: All veterans are entitled to advisory services and counseling on Federal employment from OPM offices. Honorably discharged veterans receive five points; disabled veterans and certain wives or husbands, widows or widowers, and mothers of veterans receive 10 points added to earned eligible ratings in Civil Service examination. Veterans must meet minimum qualifications requirements for the positions, in grades four through seven, including passing a written test if that is required, but need not compete with other applicants. ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Five-point preference is given to honorably separated veterans who served on active duty in the armed forces of the United States during certain periods of time. Veterans with no more than 14 years of education who served in the armed forces during the period August 5, 1964-May 7, 1975 are eligible for the above mentioned noncompetitive appointments, however this education limitation does not apply to compensibly disabled veterans. Such training may be designed to provide noncompetitive appointment.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: For veterans preference, generally proof of honorable separation such as discharge certificate or DD Form 214. In addition, for 10-point preference, a letter from Veterans Administration or military department certifying existence of service-connected disability. TYPES OF ASSISTANCE: Formula Grants; Project Grants.

USES AND USE RESTRICTIONS: Grants are available for personnel administration improvements, training of certain employees, and government service fellowships or any combination of these. Approval of the project grant must not result in a reduction in relevant State or local government expenditures or the substitution of Federal funds for State or local funds previously made available for personnel administration or training purposes. This does not preclude use of existing appropriations, budgets, or resources toward the matching share of the grant program. Administration of programs supported by an IPA grant must be consistent with the applicable merit principles stated in the Act. At least 50 percent of the amount allocated to any State must directly benefit local governments. Discretionary funding: The Intergovernmental Personnel Act allows 20 percent of available grant funds to be distributed at OPM's discretion. OPM considers the equitable distribution of funds among States and between State and local governments, and factors such as intergovernmental cooperation, population, number of employees affected, the urgency of the program, the need for funds, and grantee's potential to use the funds most effectively. JOINT FUNDING: This program is considered suitable for joint funding with with closely related Federal financial assistance programs in accordance with the provisions of OMB Circular No. A-111. For programs that are not identified as suitable for joint funding, applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved.

Indian governing bodies that perform substantial governmental functions are also eligible, regardless of population size. A general local government or group thereof that serves a population of less than 50,000, may receive a grant from OPM provided it is involved in programs of national interest and is experiencing personnel administration problems or training needs related to such national programs interest or a subgrant from a State government or other IPA grantee. For the purposes of the Act, "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and U.S. territories and possessions. Organizations representing State and local governments, associations of State or local public officials, and nonprofit organizations which provide requested services to governments may receive a grant for training State and local government employees.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Applications should be submitted and signed by the chief executive or other officials authorized to apply for grants on behalf of the jurisdiction or organization applying for a grant. The chief executive must certify that approval of a grant will not result in a reduction in relevant State or local government expenditures nor the substitution of Federal funds for State or local funds previously made available for personnel administration or training purposes; and that administration of programs or projects supported by a grant will be consistent with the applicable merit principles stated in the Act. Costs will be determined in accordance with FMC 74-4 for State and local governments. Cost estimates in the applications are to be prepared accordingly.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Joint discussions among State and local governments concerning possible arrangements for interjurisdictional cooperation under IPA to facilitate effective program development are suggested. Communications and cooperation between Indian tribal governments and State and local governments are encouraged. In addition, all local government applications must first be submitted to the Governor for review, comments, and recommendations. However, if the general local government certifies to the OPM that the application has been before the State government for 60 days without action, OPM will accept the application without the Governor's comments or recommendation. Pre-application consultation with the OPM staff is also encouraged. The standard application forms as furnished by OPM and required by OMB Circulars No. A-102 for State or local governments or A-110 for other organizations must be used for this program.

Notification of awards must be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082.

Deadlines: There are no nationwide cutoff dates. However, the headquarters or the regional OPM offices may set deadlines for receipt of competitive applications for discretionary (20 percent) funds. State offices designated by governors to administer the IPA may set deadlines for receipt for formula (80 percent) funds.

Range of Approval/Disapproval Time: OPM will acknowledge all applications upon receipt. Generally, final action is taken on applications within 30 working days.

Appeals: Not applicable.

Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: The amount of 80 percent of the total available for grants each fiscal year is allocated among States on the basis of an objective weighted formula which includes the factors of population and number of State and local government employees. The remaining 20 percent of the funds is distributed at the discretion of OPM to further IPA objectives. Grants may represent up to 50 percent of program costs. No state, as a whole, may receive more than 12.5 percent of the total available funds.

Length and Time Phasing of Assistance: Awards are normally made for a 12-month period, or less; however, projects may be multiyear. Payments may be made on a letter of credit, advance payment, or reimbursable basis.

AUTHORIZATION: Title VI of the International Claims Settlement Act of 1949, as amended; Public Law 94-542, approved October 18, 1976, 90 Stat. 2509.

OBJECTIVES: To provide for determination of the validity and amounts of outstanding claims against the German Democratic Republic which arose out of the nationalization, expropriation, or other taking of (or special measures directed against) property interests of nationals of the United States, whether such losses occurred in the German Democratic Republic or East Berlin.

TYPES OF ASSISTANCE: Direct Payments with Unrestricted Use.

USES AND USE RESTRICTIONS: The Commission is authorized to receive and determine the validity and amounts of claims, and certify to the Secretary of the Treasury for payments out of such sums as may be paid to the United States by the German Democratic Republic, those claims of nationals of the United States found to be compensable. The term "national of the United States" means (a) a natural person who is a citizen of the U.S. or (b) a corporation or other legal entity which is organized under the laws of the United States or of any State, the District of Columbia, or the Commonwealth of Puerto Rico, if natural persons who are citizens of the U.S. own, directly or indirectly, 50 percent or more of the outstanding capital stock or other beneficial interest of such corporation or entity. It does not include aliens. "Property" means any property, right, or interest, including any leasehold interest, and debts owed by enterprises which have been nationalized, expropriated, or taken by the German Democratic Republic for which no restoration or no adequate compensation has been made to the former owners of such property. "German Democratic Republic" includes the government of any political subdivision, agency, or instrumentality thereof under its control. In order for a claim to be favorably considered, the property right on which the claim is based must have been owned, wholly or partially, directly or indirectly, by a national of the United States on the date of loss, and held by one or more nationals of the United States continuously from the date that the loss occurred until the date of filing with the Commission.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Applicant must be a national of the United States at the time of the filing of the claim.

Beneficiary Eligibility: After the initial filing of a claim, the claim will be adjudicated, and if the claim is found to be compensable, payment will be made by the Department of the Treasury (when and to the extent funds become available) to the claimant, his or her successor-in-interest, or his or her designee.

Credentials/Documentation: The burden of proving that the loss was actually sustained is upon the claimant, who is deemed to be the moving party. In addition, the claimant must show that the nationality requirements have been met, that the claimant or his or her predecessor in interest owned the property, and that there was, in fact, a taking by the German Democratic Republic of property in the German Democratic Republic or East Berlin.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: Formal claim applications must be obtained from, and returned to the Foreign Claims Settlement Commission. This is the only manner in which a claim may be filed. The deadline for filing such claims was May 16, 1978. Upon receipt of the claim application, it will be acknowledged, docketed, and a claim number will be assigned.

Award Procedure: Claims are considered throughout the period of the program. Upon adjudication of a claim, a Proposed Decision is entered. If no objections are received within the period prescribed in the Commission's regulations, the Proposed Decision is entered as the Final Decision of the Commission. Awards are subsequently certified to the Secretary of the Treasury for payment (when funds become available) in accordance with the statutory requirements.

Deadlines: The deadline for filing claims with the Commission was May 16, 1978. The Commission is required to complete its work under the program by May 16, 1981.

Range of Approval/Disapproval Time: Claims are adjudicated as soon as possible before the completion date of the program.

Appeals: Any claimant whose claim is denied, in whole or in part, is entitled to a hearing before the Commission or its representative with respect to the claim. An oral hearing or a hearing on the record may be requested. Upon such a hearing, the Commission may affirm, modify, or review its former action with respect to such claim, including a denial or reduction in the amount theretofore allowed.

Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Not applicable.
